Remember: a disability descriptor is simply a medical diagnosis.
People First Language respectfully puts the person before the disability.
A person with a disability is more like people without disabilities than different.

Say:

He has a cognitive disability/diagnosis.
She has autism (or a diagnosis of...).
He has Down syndrome (or a diagnosis of...).

He has a mental health condition/diagnosis.
She uses a wheelchair/mobility chair.
He receives special ed services.
She has a developmental delay.
Children without disabilities.
